EXECUTIVE SUMMARY

Executive Summary

Key Takeaways

- 56% of your audience are prospects who haven't purchased MLB: The Show yet — a massive untapped growth opportunity of 630 potential buyers
- Men purchase at nearly 2× the rate of women (45% vs 25%) — closing this gender gap is the single largest growth lever available
- Graphics and Gameplay are the two features that matter most to purchasers — 68% cite Graphics and 63% cite Gameplay as key purchase drivers
- Only 20% of prospects show strong purchase intent (scores 7–10) — awareness exists but conversion barriers remain
- Older gamers (45–54) are power users playing 10+ hours/week at 52% vs 26–32% for younger groups — they're your most engaged segment

- 56% of the audience (630 people) are prospects — the biggest growth opportunity
- Men purchase at 45% vs women at 25% — a 2× gender gap that represents untapped potential
- Graphics (68%), Gameplay (63%), and Realism (59%) are the top 3 purchase drivers
- Only 20% of prospects show strong purchase intent — conversion is the challenge, not awareness

i Audience Composition: Purchasers vs Prospects

N=1,121

Over half the audience (56%) are prospects who haven't purchased — a 630-person opportunity pool waiting to convert

i Purchase Behavior by Gender

N=1,121

▲ Significantly higher ▼ Significantly lower 95% confidence

Men purchase at nearly 2× the rate of women (45% vs 25%) — closing this gender gap is the single largest growth lever

95% CI: Male Purchaser rate significantly higher than Female ($p < 0.001$)

Top Purchase Drivers Among Buyers

N=419

Graphics and Gameplay are the two dominant purchase drivers — together they influence 2 out of 3 buyers

Purchase Intent Among Prospects (10-Point Scale)

N=208

Only 20% of prospects score 7-10 on purchase intent — awareness exists but conversion barriers remain

Weekly Play Hours by Age Group (Purchasers & Players)

N=491

▲ Significantly higher ▼ Significantly lower 95% confidence

Gamers aged 45-54 are power users — 52% play 10+ hours/week vs 26-33% for younger groups

95% CI: 45-54 age group significantly higher on 10+ hours than all other age groups ($p < 0.001$)

i Age Distribution

N=1,121

Sample skews toward 35-44 (30%) and 26-34 (27%) – core gaming demographic

SAMPLE DEMOGRAPHICS — KEY FINDINGS

- 62% male, 38% female — typical gaming audience skew
- 30% are aged 35-44, the largest single age group
- South region dominates at 36%, followed by West (24%) and Midwest (22%)
- Sample is evenly distributed across age groups 26-54, representing the core gaming market

i Gender Distribution

N=1,121

Sample is 62% male, 38% female — typical for sports gaming audiences

i **Age Group Distribution**

N=1,121

Age groups 26–54 represent 83% of the sample — the core gaming demographic

i **Regional Distribution**

N=1,121

South region dominates at 36%, followed by West (24%) and Midwest (22%)

i Purchase Behavior by Age Group

N=1,121

▲ Significantly higher ▼ Significantly lower 95% confidence

Purchase rate increases with age — 40% of 45-54 year-olds are purchasers vs 32% of 18-25

95% CI: 26-34 and 35-44 Game Pass Player rates significantly higher than 45-54 ($p < 0.05$)

PURCHASE DRIVERS & FEATURES — KEY FINDINGS

- Graphics (68%), Gameplay (63%), and Realism (59%) are the top 3 purchase drivers
- Challenging gameplay is the #1 factor linked to higher engagement (39% importance)
- Customization matters more to engaged players — 22% importance for play hours
- Features are largely independent — low overlap means each adds unique value

Key Purchase Drivers (% of Purchasers Citing)

N=419

Graphics and Gameplay are the two dominant drivers — every marketing message should lead with these

What Drives Engagement: Play Hours Analysis

N=1,121

Challenging gameplay is the #1 driver of play hours (39% importance) — difficulty keeps players engaged longer

Feature Correlation Matrix

N=1,121

All features show weak overlap ($r < 0.2$) — each adds independent value, you can't compensate for one with another

Other Sports Games Purchased (Last 5 Years)

N=419

MLB purchasers are multi-sport gamers — 84% also bought Madden, 77% bought NBA 2K

Sports Game Purchases by Age

N=419

▲ Significantly higher ▼ Significantly lower 95% confidence

Younger gamers buy more FIFA and NBA 2K — older gamers focus on Madden and MLB

95% CI: 18-25 and 26-34 significantly higher on FIFA and NBA 2K vs 45-54 ($p < 0.05$)

PROSPECT CONVERSION OPPORTUNITY — KEY FINDINGS

- 630 prospects represent 56% of the total audience — the biggest growth pool
- Only 20% of prospects show strong purchase intent (7-10 on 10-point scale)
- Male prospects show slightly higher intent (21%) vs female prospects (18%)
- Purchase intent is consistent across all age groups (19-20%) — age is not a barrier

Purchase Intent Distribution (Prospects Only)

N=208

Only 1 in 5 prospects show strong purchase intent — conversion is the challenge, not awareness

Purchase Intent by Gender (Prospects)

N=630

Male prospects show slightly higher intent (21%) vs female prospects (18%) — but both are low

Purchase Intent by Age Group (Prospects)

N=630

Purchase intent is remarkably consistent across all age groups (19–20%) — age is not a conversion barrier

BUYER SEGMENTS — KEY FINDINGS

- Three distinct buyer types: Graphics Purists (40%), Feature Enthusiasts (33%), and Card Collectors (27%)
- Graphics Purists want visuals and realism but skip customization — they're the largest segment
- Feature Enthusiasts want everything — 100% cite customization, 85% cite graphics
- Card Collectors are a niche (27%) focused on player cards — lowest on graphics and realism

Buyer Segment Sizes

N=419

Three distinct buyer types — Graphics Purists are the largest at 40%, followed by Feature Enthusiasts (33%)

Segment Profiles: Feature Preferences

N=1,121

Feature Enthusiasts want everything (100% customization, 85% graphics) — Card Collectors are a niche focused on player cards

Segment Engagement Levels

N=419

Feature Enthusiasts play the most (avg 3.2 hours category) — Card Collectors play the least (2.8)

PLAYER SEGMENTS (ALL USERS) — KEY FINDINGS

- Four player types identified: Casual Players (28%), Feature Enthusiasts (30%), Graphics Realists (26%), Challenge Seekers (16%)
- Feature Enthusiasts are the most engaged — 100% cite customization and 94% cite graphics
- Casual Players are the largest low-engagement group (28%) — low on all features
- Challenge Seekers are a small but distinct niche (16%) — 100% cite challenging gameplay

Player Segment Distribution

N=419

Four distinct player types — Feature Enthusiasts and Casual Players are the two largest at ~30% each

Player Segment Feature Profiles

N=1,121

Feature Enthusiasts want everything — Graphics Realists focus on visuals and realism only

Segment Play Hours (Avg Category)

N=419

Feature Enthusiasts play the most (3.2 avg) — Casual Players play the least (2.8 avg)

ENGAGEMENT & PLAY PATTERNS — KEY FINDINGS

- 36% of active players play 10+ hours/week — these are your power users
- Older gamers (45–54) play 10+ hours at 52% vs 26–33% for younger groups — 2× engagement
- Men and women show similar engagement patterns — no gender gap in play hours
- 30% play 6–9 hours/week — the second-largest engagement tier

Weekly Play Hours Distribution

N=491

36% of active players are power users playing 10+ hours/week — your most valuable segment

? Play Hours by Age Group

N=491

▲ Significantly higher ▼ Significantly lower 95% confidence

Gamers aged 45-54 are power users — 52% play 10+ hours/week, double the rate of younger groups

95% CI: 45-54 significantly higher on 10+ hours than all other age groups ($p<0.001$). 18-25 significantly higher on 6-9 hours vs 45-54 ($p<0.05$)

? Play Hours by Gender

N=491

Men and women show similar engagement patterns — no meaningful gender gap in play hours among active players
